

Lenell White

Knowledgeable Application Engineer evaluates and integrates software throughout sales cycle to drive meaningful solutions and increase sales. Collaborates with salespeople to implement application designs supporting customer needs and technical challenges. Offers product design, testing and continuous improvement for cost-effectiveness and market leadership.

EDUCATION

Deltona High School, Deltona FL —**H.S. Diploma**

Graduation- 2020

General studies to include honors courses taken with college credit classes including pre-calculus, physics, history, and other general educational courses. Always studied and maintained a GPA over 3.3. Member of afterschool programs: football and weightlifting.

Embry-Riddle Aeronautical University January 2021 – Present

I am currently attending college in an online presence. My goal is to achieve my bachelor's in software engineering. I have already completed 4 courses and am continuing to persevere. These classes include Physics, Calculus, Introduction to coding for Engineers and more along these subjects. I currently hold a 3.14 GPA and plan on doing my best to achieve this goal.

August 2018 - present, Deltona, FL

Assisted senior coaches teach kids how to play football and help with providing hydration and other needs on and off the field.

WORK EXPERIENCE

MCDONALDS

(March 3, 2020 - November 28, 2020)

It was my first job that was picked up right after high school. I started off as only doing customer service duties but after 3 weeks quickly picked up everything in the store. In no time I became a reliable employee that could do it all. As a result, I gained a lot more credibility and gained more hours to my shifts. The Managers used to say that I showed hard work and effort while becoming a role model for the other employees. I was recommended to become a part of crew management but declined due to other responsibilities I held outside of work.

Arise Remote - Peloton Interactive

(July 2021 - January 2022)

This job was a remote job where I was doing customer service. In this, I answered calls from customers who had issues with their orders and I had to solve their problems. I was working under Peloton through Arise.

- Certified Adobe Photoshop
- Certified Adobe Graphic Design & Illustration

PROJECTS

Volusia County Schools Ted Talk (speech)

August 2016 Galaxy Middle School

Title: The ways to get through to your student

Volusia County Schools Talks(speech)

July 2019

Title: Going beyond Schools

Personal Accomplishments

As a side job I hone my skills with the computer by constantly doing personal projects. Below will show what I have accomplished.

Adobe Certification

- In my high school few were offered the chance to become certified in Adobe. I was good enough to become certified in both Adobe Illustrator and Photoshop

WEBSITE DEVELOPMENT:

- I have developed websites for commerce usage. I have created 3 websites for local businesses that I have helped.

www.coastal-drip.com

-This was my first created website where I took my ideas from photoshop and created a clothing brand with the use of Shopify. Currently, the shop is closed but is still one of my personal achievements.

www.Cloudviberz.com

-This is my most recent website that promotes advertising for rappers and social stars.

www.Bankai-fitness.com

-This was one of my first jobs where I was asked to create a logo and fitness page. This time I used Wix and integrated a lot of programs using my own coding.

<https://www.blacksmokeproductions.com/>

-Black Smoke Productions is a photography team created by myself and my partner Justin Watkins. We take pictures and upload them on our website to sell. We also have taken on jobs where we travel and take photoshoots.

www.agmstyles.com

-AGM Styles is a hairstylist in Florida that asked me to make a website for their business. With this I used software to create bookings and for clients to contact the stylist.
